

MaYoMo is a web media platform for Mobile Citizen Journalism. Our goal is to display private views on public issues, not to expose private issues to public viewing. MaYomo is a founding member of the Digital Spaces Living Lab.

We are unique in:

- The way we organize your content/materials on the **Map** and the **News Time Line**
- **Virtu** - new continent with virtual countries. Virtu is our Virtual continent where you can find content about computer games and virtual worlds. You can find Virtu on our world map right between Europe and America.
- **News Demand** - where you can order News from all over the world and time. News Demand is a unique way to ask for information you need. Whether you want to find out what the main street looks like in a village somewhere around the world or to understand how the animals in Sydney's zoo are doing – simply upload a “News Demand” request and wait for response.
- Many new features coming soon...
